Skin Care

Do:

1. Need $\frac{1}{4}$ to $\frac{1}{2}$ inch long for waxing to be effective.
2. Stop shaving 14 days prior to waxing.
3. Release, but do not remove ingrown 4 to 5 days before service.
4. Gently exfoliate the areas 24-48 hours before the service.
5. Avoid exposure to the UV violet rays and/or sun.
6. Use cold compress/aloe vera gel afterwards.
7. Taking an aspirin can help prior to minimize any pain.

Do Not:

1. Take HOT showers the remainder of the day.
2. Apply makeup, perfume products, or (tanning) lotions.
3. Exfoliate the waxed area for the next 24-48 hours.
4. Get a hair removal service if you have had any of the following treatments: chemical peels, dermabrasion, glycolic acids, alpha hydroxy acids.
5. Use Retin A or any other exfoliating agent within 3 inches of the desired removal area.
